The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 9 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over RYHAM or GAUTREAUX, Jr. in view of MARTIN et al.

RYHAM or GAUTREAUX, Jr. Teaches treating stripping gases of sulfides and other volatile components from liquor vapor condensate. RYHAM then treats the gases in a thermal destruct unit to further remove sulfide gases; or GAUTREAUX, Jr. teaches scrubbing the stripped gases to further remove sulfides. MARTIN et al teaches scrubbing gases to further remove sulfur dioxide gases using alkali in a closed loop regenerative oxidation process (RTO). MARTIN teaches that the RTO is an alternative to a thermal destruct process. It would have been obvious to use the closed use the closed loop RTO process of MARTIN for the thermal destruct unit of RYHAM. Or it would have been obvious to use the closed loop RTO scrubber of MARTIN et al for the scrubber of GAUTREAUX, Jr. as they are used for the same purpose of removing volatile components from the stripper off gas.

Applicant's arguments have been considered, but are not convincing as they are not commensurate with the claims. For example, Applicant argues that the process uses a closed loop so that different components (such as SO<sub>2</sub>) are partly recycled, but the claimed SO<sub>2</sub> scrubber is not part of the closed loop.

The following claim would be given favorable consideration:

Claim 1:

Lines 4 and 10, after "condense" add --from a pulp manufacturing process--;

Line 6, delete "and" and after "(RTO)(2)" add --and an SO<sub>2</sub> scrubber (3)--;

Line 8, change "is" to --are--;

Line 9, change "stripping" to --used to strip--;

Line 13, change "under formation of SO<sub>2</sub>" to --forming an SO<sub>2</sub> enriched gas--;

Line 14, change "a" to --the--.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
